

|                    |                                                                                      |
|--------------------|--------------------------------------------------------------------------------------|
| megacity           | a city that has a population of more than 10 million people                          |
| population density | the number of people living in each unit of area (e.g. square mile or kilometre)     |
| urbanisation       | the process of moving from the countryside to a town or city                         |
| human geography    | the relationship between humans and the environment                                  |
| physical geography | studying earth's natural features, e.g. mountains, rivers, oceans, hills and climate |

- What is urbanisation?
- Explain what a megacity is.
- How can urbanisation lead to changes in an area?
- Can you name a few megacities?
- What are the Dharavi slums and how were they created?
- What is the link between a high population density and housing?
