

temperature	a measurement of how hot or cold something/a place is
tundra	a cold, frozen area of land where not many trees can grow
climate	moving to a foreign country (a country that is not your home country)
equator	an imaginary line that goes around Earth - it is equal distance apart from the north pole and the south pole
Inuit	people who live in the Arctic Circle, such as on the island of Greenland

- Where are the world's hottest places located?
- What hot places are found near the equator?
- What hot places are located in the tropics?
- Why would it be difficult to live in the Arctic and Antarctica?
- What is special about the North and South Pole?
- Which continents are part of the Arctic?
