

mechanism	a set of moving parts that work together to do a specific job.	- What is a mechanism? - What will your story book be about? - What are the main parts of a design process? - What materials and tools will you need? - How will you join and make your model?
levers	a simple mechanism that uses a bar to pivot around a fixed point called a fulcrum.	
sliders	a moving part that goes forwards and backwards or up and down in a straight line	
fulcrum	the point at which the lever turns or is supported.	
pivot	a fixed part that holds a lever in place as it turns.
